

## **Defining the Scope of Application for the Strategy for Development of Sustainable Tourism of the Carpathians: Draft map and the list of administrative units**

The Carpathian Convention Working Group on Sustainable Tourism at its meeting on 12-14 May 2014, Bratislava, Slovakia, discussed the map presented below. The Working Group concluded that along with administrative units, the map should include the geographical scope of the Carpathians as it is currently defined by the Party. The geographical scope of the Carpathians defines the core area for implementing the actions outlined in the strategy, while the administrative borders are useful for decision making, resource allocation and monitoring purposes.

The Working Group decided to develop two maps that may be useful during the implementation of the strategy:

1. *A map of local administrative units on LAU1 level in EU countries, “raions” in Ukraine and municipalities in Serbia that also features the geographical scope of the Carpathians.*

Such map may be helpful when involving the authorities and stakeholders into project development and implementation and when action is needed for decision making and implementation on the smallest administrative level.

2. *A map of administrative units at NUTS3 or NUTS2 level, “oblast” in Ukraine and districts in Serbia that also features the geographical scope of the Carpathians.*

Such map would be useful when action is needed on the regional decision level, and whenever the interlinkage of the Carpathians with surrounding areas is important (e.g. for optimizing transport infrastructure)

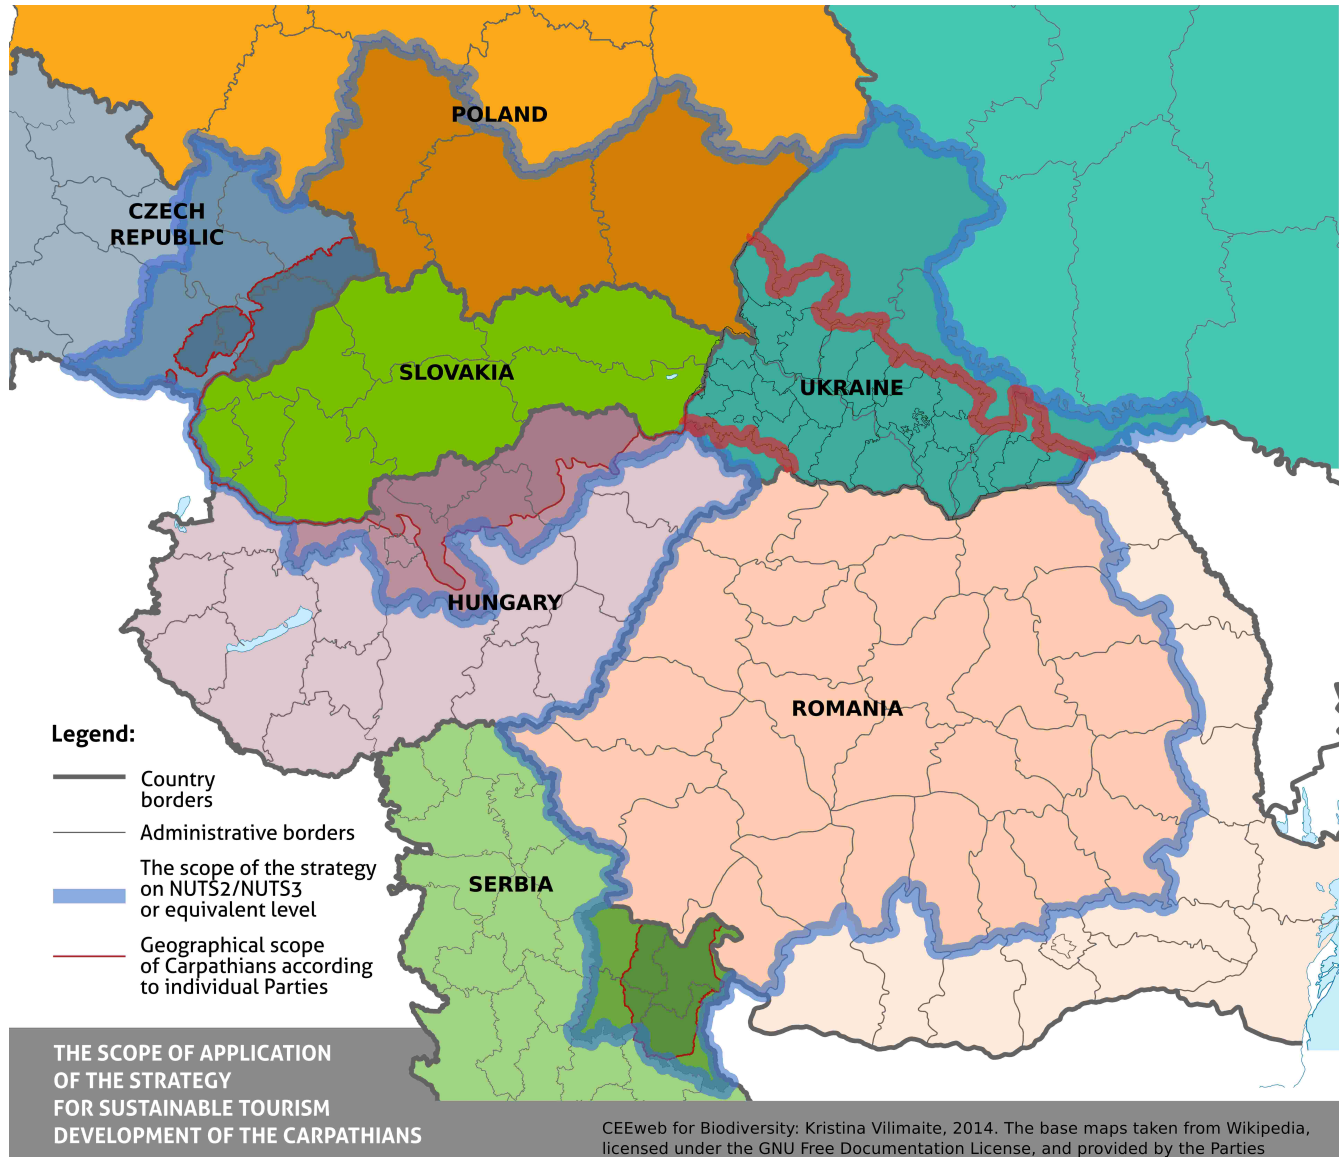

In the light of the decision of the Working Group the Interim Secretariat requests the Parties:

- to review the list of administrative units provided in the file attached (all countries, please also send the confirmation if the information is correct);
- to provide the Interim Secretariat with a vector file of a country map with LAU1 level administrative units (still needed for Hungary, Poland, Romania, Serbia);
- to provide the Interim Secretariat with a vector file of the geographical scope of the Carpathians as it is currently defined by the Party (still needed for Poland, Romania, Ukraine).

For the maps the preferred file formats are SVG or shape files. If not available, AI, CRD PS, EPS can be provided.
