Brainstorming on the Sustainable Transport Action Plan

Filippo Favilli
Eurac Research

TRANSGREEN PROJECT

Carpathians Working Group on Sustainable Transport

17 May 2018, Budapest

Session Objectives

12 – 12:20 PLENARY - brainstorming:
- Why an Action Plan is needed

- Confirmation/Identification of main topics to be included

- Prioritization

12:20 – 12:50 WORLD CAFÈ (*Divergence*):
How do you relate with the identified issues? What is your local experience? How would you transpose it to the whole Carpathians?

**12:50 – 14:30** --------------------------LUNCH---

14 – 15:30 PLENARY (*Convergence*):
- Potential actions for what solutions + resources available
- Responsibilities (*Who is missing in this group? who is in charge? Who should do that?*)
- Planning measures and steps to implementation
- Who wants to join each group?

16 – 17 PLENARY (*Synthesis*)
- Conclusions and next steps

"Kill the elephant, analyse, rebuild the elephant"

**Today we are brainstorming
Not writing**

PART 1

Action Plan for what?

- Action plan focuses on ecological corridors and fragmentation related to transport development in the region

- Action plan should be linked to all other project outputs, especially to the Guidelines & Recommendations;

- 3 levels, the model areas, process management level and political level respectively

- It should contain actions, responsibilities, timeframe and financial implications

- Action plan should contain the adoption of the Guidelines

Action Plan for what?

Added value of the Strategic Action Plan:

- Summarize and select the knowledge relevant for strategic decision making (introduction, why we need to do anything at the strategic level of policies)

- It defines the goals for strategies included in future political documents addressing the problems from the perspective of available knowledge (summarised and developed) in the project

Why do we need an Action Plan?

❖ Effects of transports on Biodiversity

❖ Transport infrastructures and traffic of Carpathians

❖ Legislative framework (UE, international, national)

❖ Ecological connectivity and wildlife

Collection of main topics and prioritization

❖ Do you agree with the highlighted topics?

❖ Is there anything that you want to add?

→ **Brainstorming**

TOPIC	RANK
…………………	
………………………………	
………………………………………	

World café and division in discussion groups

World café and division in discussion groups

➢ Which exactly are the problems?

❖ Integration of linear infrastructures into different kinds of landscapes

❖ Fauna passages, mitigation

❖ Compensation measures

❖ Monitoring

➢ Which solutions do you suggest?

Did you already face these issues?
What are the main aspects to be faced?
What solutions to you suggest?

Proposed action	Who	What topic	When

Meeting number 1: 17th May 2018

Title of proposed solution:

Proposing organization:

Other participants:

Connection with other proposed solutions:
-
-
-

Feasibility:
- **Feasible** (*when concretely do we start to work on it?*)
- **Need more information** (*we need additional meetings to better define it*)
- **Difficult/idealistic** (*what do we need to make it clearer? Best practices? More experts' opinions? Site visits?*)

NEXT STEPS:

NEXT MEETING:

AIM:

- Invite current missing and important people

- Discuss proposed actions and solutions in groups of interest

- Analyse feasibility of solutions

- Define a timeframe for implementation
