

Local initiatives for deployment of green infrastructure within Natura 2000 sites in the Carpathians

LIFE Green-Go! Carpathians

Project Leader: UNEP/GRID-Warsaw Centre

in cooperation with the Secretariat of the Carpathian Convention

Project duration: September 2017 – December 2020

Project implementation area: geographical scope of application of the Carpathian Convention in Poland

Key Project activities and outputs to date:

- **capacity building:** (a) **consultation seminars** for institutional stakeholders, incl. nature protection authorities; (b) series of **training workshops** for Carpathian local self-governments and NGOs on sustainable spatial planning and management of green infrastructure
- **geoportal:** www.zielonainfrastruktura.karpatylacza.pl/geoportal and dedicated **mobile application** (EN versions available) for inventorying and mapping of green infrastructure on the local scale
- **GIS analysis of conditions of green infrastructure development in Polish Carpathians:** landscape and land cover diversity, housing dispersion, local spatial plans, habitat fragmentation, ecological corridors, protected areas; results visualized on the geoportal
- **e-learning platform** with multimedia materials (incl. VR movies, thematic animations, etc.) on green infrastructure (under construction)
- launching a **competition on local case studies** and implementation plans on green infrastructure development
- **pending: inventory of green infrastructure-related undertakings in the remaining Carpathian countries via an on-line questionnaire:** www.zielonainfrastruktura.karpatylacza.pl/questionnaire. **Please, kindly take a few minutes to fill out if you haven't yet done so. Thank you!**
