A growth package for integrated European infrastructures

**3. CONNECTING EUROPE FACILITY (CEF) –A COMMON INFRASTRUCTURE FUNDING
INSTRUMENT**

Building on the experiences and lessons learned under the existing TEN policy framework, the Commission is now proposing a new "European infrastructure package" (EIP) based on the "Connecting Europe Facility" which will be the common financing instrument for trans-European networks, creates the framework within which the sector-specific policy guidelines presented above will apply. As some of the infrastructure projects of Union interest might need to pass through pre-accession, neighbourhood and other third countries, the CEF may support where appropriate projects of common interest in order to connect the trans-European networks with infrastructure networks of these countries.
